GEOLOGICAL SURVEY

URANIUM LANDS  
URANIUM PERMITS  
TRACTS 8, 9, 10

Confidential Claim Retracted

Authorized by: SC

Date: 6/25/13

On March 16 & 17, 1972, the writer accompanied by Gene Saucier and Ray Korusko, geologists for Continental Oil Company, inspected the Laguna Tribal land uranium permits, Tracts 8, 9, and 10. The lands involved include 37,503 acres located in Townships 11, 12, & 13 North, Ranges 1 and 2, West, NMPL, Sandoval and Bernalillo Counties, New Mexico.

Drilling operations are being conducted on the southern part of Tract 9 and Tract 10.

The main interest was inspecting the land that Continental has requested to relinquish. All of the drill sites had been properly abandoned with the exception of two holes that needed to be plugged and one pit that needed additional backfill. Continental will do this work immediately. The roads and drill sites have been prepared for reseeding. Reseeding will be done in the near future.

Drilling will continue through the year on the remaining land held by Continental. Engineers of this office will make inspections as necessary.
